July 31, 2008

Clinsys® Director Recognized as Industry Inspiration

BEDMINSTER, NEW JERSEY (July 31, 2008) - Clinsys Clinical Research, a therapeutically focused global contract research organization, today announced that Nila Williams, Director, Customer Relations and Global Training, has been selected as one of the "100 Most Inspiring People in the Life-Sciences Industry in 2008" by the readers of *PharmaVOICE* magazine. Recognition is based on how individuals have inspired and motivated those around them, their influence as a corporate leader, and how their actions have positively impacted the industry.

"This award is not just reflective of my efforts—it's a reflection of our team efforts," said Ms. Williams. "Every day, the hard work and dedication of my colleagues inspires me to do and be my best."

In her role at Clinsys, Ms. Williams is responsible for facilitating key customer and project team meetings. Her meeting facilitation skills have helped Clinsys to not only win new business, but maintain customer loyalties and increase the organization's scope of services. Internally, she leads the training department and develops and delivers training modules, including programs on the fundamentals of research, meeting minutes and presentation skills. Ms. Williams has also introduced and implemented the tools and methodology of Six Sigma process improvement globally across the organization and is currently working with each department to implement a new online training tool for all employees that will enable them to access training modules regardless of their location.

In the past year, Ms. Williams has played a pivotal role in the successful implementation of Clinsys' Global Project Solution® (Clinsys GPS®) and remains the driver behind its continued success. Clinsys GPS is a unique, highly effective and proven integrated project management solution that brings the sponsor and Clinsys project teams together to collaborate and agree on all aspects of the clinical study—before, during and after—to ensure the project's objectives are met. This methodology is also applied to all of Clinsys' internal processes, and Ms. Williams takes personal responsibility for ensuring Clinsys GPS is understood, embraced and effectively utilized by all team members.

"The dedication and passion with which Nila Williams approaches every endeavor is only a small part of what makes her an inspiration," said David E. Williams, Chief Executive Officer of Clinsys. "Professionally and personally, Nila is regarded as a leader, mentor and an outstanding example of the tremendous impact one person can have on an organization, a community and an industry."

Ms. Williams' commitment to excellence extends throughout the industry and local community. She has partnered with the State of North Carolina Economic Development Group, Wake County Workforce Development Board and the North Carolina Community College System for past and future training programs for Clinsys employees. She is also a member of the American Society for Training and Development and the American Society for Quality.

Ms. Williams is profiled in the July/August edition of *PharmaVOICE*, available online at www.pharmavoices.com.

About Clinsys Clinical Research, Inc.

Clinsys Clinical Research, Inc.®, is a therapeutically focused global contract research organization that provides pharmaceutical, biotechnology and medical device companies with a full range of clinical research services in support of Phase I-IV drug and device development. Clinsys has expertise in highly specialized therapeutic areas, including oncology, central nervous system, dermatology, respiratory and cardiovascular. To ensure all projects are completed successfully and efficiently, Clinsys employs its Global Program Solutions™, which integrate its Global Project Solution® (Clinsys GPS®) methodology with Therapeutically Aligned Program Strategists™ (Clinsys TPS™) team capabilities.

Clinsys is a Jubilant Organosys company headquartered in Bedminster, New Jersey, with operations in Raleigh, North Carolina; Philadelphia, Pennsylvania; and Düsseldorf, Germany. Clinsys Clinical Research, Ltd., with operations in Noida and Bangalore, India, provides extensive clinical research services for Phase I-IV drug development, and operates a clinical pharmacology unit performing bioavailability and bioequivalence studies as well as bioanalytical sample analysis, clinical laboratory and pathology services. Clinsys ALTERNA™ (clinsysalterna.com), a division of Clinsys Clinical Research, Inc., partners with clients globally to provide customized Phase I-IV clinical trial alternative solutions to the conventional outsourcing model.
